

POLYPROPYLENE BENEFITS

From all the great number of properties that polypropylene has, we must remark those of great importance such as:

It has great glow and transparency.

It has a high superficial and impact resistance.

It has better side sealings than those found in Bioriented-Polypropylene (BOPP)

It has good quimical resistance to humidity and heat.

It has high superficial strenght and dimensional establiity.

It's easy to recicle and it's easily desintegrated for a low cost with oxo-biodegradable aditives.
